1) Health, Safety & Environment
   No reportable incidents.

2) McMurdo Operations
   • Personnel on Site:
     Frank Rack, Dar Gibson, Graham Roberts, Chad Carpenter, Daren Blythe, Justin Burnett, Jeff Lemery, Dennis Duling, Adam Melby, Robin Bolsey
   • Summary:
     Plumbing: Glycol flow meter bypassed as it doesn't work properly; some research into this problem needed.
     Electrical: Big generators operational but power distribution remains a problem; ASC techs are troubleshooting the PDM. Work continues on network/control/sensing system; load cell and supporting electronics being assembled.
     General: Tabs welded to crescent trolley to jack it up slightly when extending rails to pass obstruction; plates welded for mounting rear crescent support legs. Requirements for science water supply hose assessed. Fuel to system turned on.

3) Upcoming Events/Tasking:
   • Begin melting snow to fill main tank; attach rear crescent support legs; continue load cell/payout encoder & other sensor preparation.

4) General Issues:
   • None to report.

5) Weather Conditions
   • Temperatures ranged between 30 and 40°F during the day. Cloudy and warm with calm winds.
6) Vehicles/Generators
   - Vehicles in use: Caterpillar 297 skid steer, Mattrack pickup.
   - Generators in use: Two WISSARD 50 kW generators; portable 3.5 kW and portable 1 kW from ASC. Large generators are not operational yet.

7) ASC Interfacing
   - Two ASC electricians still on loan to help with electrical work.
   - Two generator techs on site to prep gens for use.

8) Cargo
   No cargo delivered to site today.
